

# 1988 INDEX

## A

Aflatoxin neutralized, Mar-4  
AIDS research and new ornamental houseplant, Nov-12  
*Alternaria crassa*, control for jimsonweed (pat.), Jan-16  
Anaplasmosis, Sep-4  
Apolipoproteins, May-13  
Apple bruises recorded, Aug-5  
Atrazine on range grass, May-5  
Australian chestnut, Nov-12

## B

*Bacillus thuringiensis*, Jan-16  
*Bacillus thuringiensis* in soil, Jan-14  
Bean rust resistance, Sep-12  
Bees  
    menthol counters tracheal mites, Jan-6  
    weakened by mite, May-4  
Biocontrol  
    fungi, Feb-13  
    Russian wheat aphid, Nov-12  
    parasitic wasp, Feb-4  
Bluestem, Aug-8  
Boars, bored, Feb-5  
Body weight and diet, Sep-14  
Byssinosis (pat.), May-16

## C

Calcium  
    loss, Sep-4  
    pectate in vegetables, Jan-5  
Canker disease in citrus, Jan-6  
Carbon dioxide in atmosphere, Mar-6  
Carbonated milk as new soft drink, Mar-14  
Caribbean Basin Initiative, May-6  
Carolina Cajun pepper, Nov-11  
Carrots bred for carotene, taste, May-5  
Cattle  
    gene stock, Jun-7  
    grazing under power lines, Jun-4  
    grub vaccine, Feb-5  
    sex selection, Jun-10  
Cereal grain, Apr-12  
Chicken feed susceptible to aflatoxin, Mar-4  
Chickens protected from Marek's Disease (pat.), Feb-16  
Chinese dwarf trees, Oct-14  
Cholesterol  
    and colon cancer, Jan-5  
    and heart disease, May-11  
    diet to reduce, Oct-4  
Citrus, export of, Nov-4  
Compaction of soil, Aug-17  
Computerized apple, Aug-5  
Computers and diet studies, Mar-14  
Computers help plant exploring, Apr-4

Copying genes, Oct-4  
Corn

    breeding of, Aug-15  
    chromosome markers, Aug-15  
    dwarf varieties, Mar-5  
    high yields in, Apr-13  
    water stress in, Aug-10  
Cornbread with cake texture, Mar-11  
Coronary artery disease, May-11  
Cotton fiber abrasion (pat.), Feb-16  
Crops converted to chemicals (pat.), Oct-15  
*Cryptosporidium*, Oct-10  
Cucumber mosaic virus, Mar-10

## D

Diapause in psylla, Aug-6  
Diet studies use home computers, Mar-14  
Domatia in leaves, Mar-5  
Drip irrigation, Aug-14  
Drought  
    effects of, Aug-10  
    resistant crops, Aug-8  
    tolerant vegetable, May-10  
Dryland farming, Aug-11  
Dyeing flame-retardant fabrics, Apr-16  
Dyer's woad, Aug-4

## E

Electric lines and grazing cattle, Jun-4  
Electricity, wind-generated, May-14  
Embryo splitting, Jun-7  
Endotoxin in cotton (pat.), May-16  
Erosion equations updated, Apr-7  
*Euplectrus plathypenae*, Feb-4  
Exports  
    citrus, Nov-4  
    nectarines, Nov-7  
    peanuts, Nov-4  
    soybeans, Nov-4

## F

Fat reduced in diet, Oct-4  
Fat-to-lean ratio in body, Sep-14  
Fiber in diet and cancer, Jan-5  
Flame-retardant fabrics, Apr-16  
Flavor components, Jun-6  
Floriculture, May-8  
Fluazifop, Sep-14  
Food-poisoning bacteria detected by test, Jan-4  
Forage dried quickly, Aug-7  
Forum  
    ARS-Developed New Crops and Products, Oct-2  
    At Boston, A Model Research Facility, May-2  
    The Beltsville Break-In, Jan-2

Biologicals Favored in Crop Protection Plans, Sep-2  
Conservation Offers Best Odds in a Drought, Aug-2  
Gene Stock: Locating the Best, Jun-2  
An Imperative for Computer Modeling, Mar-2  
Improving Groundwater Quality, Feb-2  
Janice M. Miller, Distinguished Scientist, Nov-2  
Sixty Years of Conservation Research, Apr-2

Fruit in transit, Aug-5  
Fruitfly control process, Oct-13  
Fumigation, Nov-4  
Fungi serve as biocontrol, Feb-13  
Fungus  
    counters velvetleaf, Aug-6  
    kills weeds (pat.), Apr-16  
Furanosesquiterpenoid, Sep-4

## G

Gene  
    transfer in animals, Oct-4  
    transport, Aug-16  
Genetic engineering, vaccine, Feb-5  
Germplasm  
    Acquisition Priority Planning (GAPP), Apr-4  
    exchanges, Aug-18  
    potato, Jan-12  
Gliadin in wheat bread, Jun-11  
Gluten and bread texture, Mar-11  
Grama grass and herbicide, May-5  
Greenhouse effect, Mar-6  
Groundwater, pollution of, Feb-6  
Growth inhibitors, Jun-14

## H

Hay-making improvement, Aug-7  
*Heliothis*, Sep-6  
Herbicidal fungus (pat.), Apr-16  
Herbicide, less needed, Mar-5  
Hog breeding, Jan-4  
Houseplants, new varieties, May-9  
Hycrest, Aug-8

## I-J

Indole-3-acetic acid, Jun-14  
Induced resistance, Mar-12  
Insect census-taking, Apr-14  
Iron affects body temperature regulation, Aug-6  
Irrigation, Aug-11  
*Isatis tinctoria*, Aug-4  
Jimsonweed controlled by fungus, Jan-16

# 1988 INDEX

## A

Aflatoxin neutralized, Mar-4  
AIDS research and new ornamental houseplant, Nov-12  
*Alternaria crassa*, control for jimsonweed (pat.), Jan-16

*Isatis tinctoria*, Aug-4  
Jimsonweed controlled by fungus, Jan-16

# 1988 INDEX

## K-L

- Kenaf, Oct-6
- Lawns need less mowing, Apr-11
- Legume crop for northern states, Jan-5
- Lemont semidwarf rice, Nov-10
- Leptine in potato plants, Feb-15
- Lesquerella, Oct-8
- Lettuce diseases, Feb-4, Sep-10
- Lima bean tolerates drought, May-10
- Linear plasmids for gene transport, Aug-16
- Lubricants from lesquerella, Oct-8

## M

- Marek's Disease in chickens (pat.), Feb-16
- Microplitis croceipes*, Sep-6
- Milk can be carbonated, Mar-14
- Mites
  - beneficial, Mar-5
  - in bees' breathing tubes, Jan-11
- Moisture-shrinkable films (pat.), May-16
- Mosaic virus in lettuce, Sep-10
- Mosquito larvae, May-4
- Mulch is colored to increase yield, Mar-4

## N

- National *Heliothis* Suppression Program, Sep-9
- Nectarines, export of, Nov-7
- Nematode preys on corn rootworms, Jun-4
- Nematodes
  - and super slurper, Apr-4
  - made dormant (pat.), Jun-15
- Niesthrea louisianica*, Aug-6
- Nitrogen losses from soil, Jun-6
- No-till controls erosion, Apr-7

## O

- Oats lower cholesterol, Apr-12
- Oranges, cold hardiness, Jan-6
- Ornamental tree and AIDS research, Nov-12
- Osmotic desiccation, Jun-15
- Osteoporosis, Sep-4
- Ozone layer, Jun-6

## P-Q

- Papaya, hot air treatment, Oct-13
- Paper from kenaf, Oct-6
- Parasites, Oct-10
- Peanuts, export of, Nov-4
- Pear psylla, Aug-6

- Pearl millet, Aug-8
- Penjing, Oct-14
- Peppers as cash crop, Nov-11
- Permanent press fabric treatment, Aug-19
- Pesticides in groundwater, Feb-6
- Photosynthesis in corn, Apr-13
- Pollen (pat.), Sep-15
- Polytherm (pat.), Mar-16
- Pork productivity systematized, Feb-5
- Potatoes
  - breeding improved varieties, Jan-12
  - repel insects, Feb-15
  - yield more, Mar-4
- Protoplasts (pat.), Sep-15
- Puerto Rican crops, May-6

## R

- Raisins, virus aids storage (pat.), Nov-13
- Rhizobacteria, Apr-5
- Rice
  - Lemont semidwarf, Nov-10
  - red, herbicidal control of, Sep-14
- Root-dwelling bacteria, Apr-5
- Russian wheat aphid, Nov-12

## S

- Sex selection in cattle, Jun-10
- Sheep, homosexual rams, Nov-11
- Shrink-wrapping vegetables (pat.), May-16
- Sleep problems and diet, Sep-5
- Sodar system counts insects, Apr-14
- Soil compaction, Aug-17
- Soybeans, export of, Nov-4
- Sperm of cattle, Jun-10
- Spiroplasmas* fed laboratory "soup," Feb-14
- Steinernema feltiae*, Jun-4
- Strawberries, everbearing, Aug-4
- Super slurper
  - moistens nematodes, Apr-4
  - reduces herbicide use, Feb-10
- Supplements of vitamin A, Oct-5
- Sweetpotato
  - french fries, Jun-5
  - whitely, Feb-4
- Swine
  - sexual behavior, Feb-5
  - testing and evaluation, Jan-4

## T

- Temperature-adaptable fabric (pat.), Mar-16
- Textile resists abrasion, Feb-16

- Thailand, site of nutritional study, Feb-11

## Ticks

- carry anaplasmosis, Sep-4
- repelled by oil, Sep-4

## Tomatoes

- flavor, Jun-6
- in small pots, Apr-5
- kept fresh, Oct-5
- yield more, Mar-4

## Trace elements in diet, Sep-5

## Trichinosis

- in swine, Oct-10
- vaccine for swine (pat.), Jan-16

## Triglycerides, May-13

## Tristan da Cunha, Aug-18

## Tristeza, citrus disease, Jan-6

## Turf grass, Apr-11

## Turkeys

- Beltsville Small White, Nov-8
- semen extender, Nov-8

## U-V

- Underground plow, Feb-12
- Vaccination of crops, Mar-12
- Vaccine for swine trichinosis (pat.), Jan-16
- VAM fungus, Aug-8
- Varroa jacobsoni* mite, May-4
- Velvetleaf, fungal biocontrol, Aug-6
- Viral satellites, Mar-10
- Vitamin A
  - and zinc, Feb-11
  - excess, Oct-5
  - in sweetpotato, Jun-5
  - upped in carrots, May-5
- Vitamin B<sub>6</sub> deficiency, Mar-13

## W

- Wasp, parasitic, Feb-4, Sep-6
- Weed
  - red rice, control of, Sep-14
  - root-dwelling bacteria, Apr-5
- Wheat-farming practices, Feb-12
- White lupin, grain crop, Jan-5
- Wind-powered turbine, May-14
- Windowbox gardening, Apr-5
- WW-Spar bluestem grass, Aug-8

## X-Y-Z

- Xylose converted to ethyl alcohol, Jun-12
- Yeast
  - collection, Jun-12
  - for wheat bread, Jun-11
- Yersinia enterocolitica* causes food poisoning, Jan-4
- Zinc linked to vitamin A levels, Feb-11
